Summary

- * I am a self-taught designer and developer, based in Singapore.
 - * I believe that great design is timeless, intuitive and aesthetic.
 - * I have learnt that coding standards and best practices are absolutely critical for the long-term success of any software project.
 - * I see teamwork, open communication and compassion as the most key values for working together.
 - * I realised that adaptability, curiosity and humility are the most important qualities to have for succeeding in the tech industry.
-

Skills

- * Knowledge of **UX methods** like competitive analysis, task flows, user scenarios, personas and interviewing for the creation and testing of UX deliverables
 - * Highly proficient in **HTML** and **CSS (with SASS)** for **rapid prototyping** in the browser
 - * Good knowledge of **jQuery** and **Javascript**, as well as version control using **Git**
 - * **Familiar with Unix-based server setup (LAMP stack)** for website deployment and very comfortable working in the command line environment
 - * Skilled in **Adobe Photoshop**, **Illustrator** and **Sketch** for the creation of web assets
-

Work Experience

Nexmo

(Sep 2018 - Present)

As a **Developer Advocate**, I act as the interface between developer communities and the Nexmo product team to ensure our products provide a great developer experience.

- Building and maintaining quick start samples, demos, example apps and other developer productivity tools and enablers
- Writing blog posts and tutorials, and using social media in order to share knowledge, request feedback, collaborate and engage with fellow developers
- Contribute to and provide feedback on APIs, SDKs, documentation and product functionality through hands-on development, individual opinion, discussions with the developer community and by organising and running beta/alpha programmes

Jewel Paymentech

(Jan 2018 - Sep 2018)

I was a **Senior Developer** in charge of the user interfaces and front-end development of Jewel Paymentech's suite of products, and my duties consisted of:

- Optimising and refactoring existing codebases to improve the performance of our products, and customer's user experience
- Standardising coding style and improving front-end documentation to facilitate the on-boarding of new team members
- Establishing a style guide for Jewel Paymentech products for a consistent branding and ease of new product development
- Building of prototypes or proof-of-concept systems for explorative research projects
- Working closely with other team members across various disciplines to continually enhance our existing product line and develop new products

Deep Labs Pte Ltd
(Mar 2016 - Apr 2017)

I was a **Front-end engineer** focused on the development of user interfaces and front-end development of web and mobile applications. My responsibilities included:

- Providing input and developing user interfaces for each phase of the application development life cycle, from ideation to design and development till release and support
- Assisting in building prototypes or proof-of-concept systems for explorative research projects
- Working closely with other team members across various disciplines to develop software applications

Nurun Singapore
(May 2015 - Feb 2016)

I was a **Senior developer** responsible for planning and architecting website implementation projects, as well as management of resources. I focused on all things front-end related, made sure our code base adhered to the latest web standards and was performant and accessible. My scope of work involved:

- Working closely with designers, providing direction on the viability of proposed designs
- Planning and designing front-end architecture for scalability and maintainability through best practices like appropriate name-spacing and ITCSS methodology
- Refactor and resurrect legacy code bases for better future maintainability
- Developing bespoke websites for a variety of clients and campaigns
- Assessing hardware requirements for optimal server provisioning
- Creating custom front-end frameworks for large-scale responsive web projects

Pixel Onion Pte Ltd
(Oct 2013 – May 2015)

I was a **Drupal architect** and worked on a variety of projects with several major clients, including DBS bank, Mediacorp and Microsoft as well as the San Francisco International Airport. My main responsibilities and contributions included:

- Designing responsive layouts, typography and site components for optimal user experience
- Developing responsive custom Drupal themes written in Sass and Susy
- Site building, deployment and maintenance using Drupal best practices to ensure scalability and security
- Submission of patches and bug fixes to contrib modules

Aristal Solutions Sdn Bhd
(Feb 2012 – Oct 2013)

I was part of the **Project Management Office** on a Core Banking Implementation for a Major Banking Group in Malaysia as an Associate consultant, working with a team of more than a hundred strong. I managed the overall project issue log as well as prepared weekly updates to project leadership. I was also responsible for defect analysis, and liaised with the developers to facilitate issue resolution.

Qualifications
