What is CSS Grid?

A **two-dimensional** grid-based layout system,
optimised for **user interface design**.

Why is Grid a good thing?

*“ Grid is the only layout technique that establishes a **relationship** between rows and columns of grid items. ”*

Using DevTools to learn Grid

Live demo

And this Subgrid thing?

Allows **nested grids** to participate in
the **sizing** of their **parent grids**

Using DevTools to Learn Subgrid
